

The New Forest Hospital Radio Studios

In December 2006 we finally moved into our new custom built studio after raising over £35,000 for new state of the art equipment. This sum included £6000 donated by the Hospital League of Friends. We use the Myriad broadcast software system in the studio which holds over 7,500 music tracks. The studio is named in memory of Basil Trask, one of our founder members who passed away before the new studio was completed, but without Basil's help and effort New Forest Hospital Radio would not be what it is today. Our equipment is as follows:

Broadcast Studio

- Sonifex S2 Solutions split mixer
- Denon DN-C635 CD player x 2
- Tascam MD350 FS MD deck x 2
- Marantz PMD570 Compact Flash recorder
- Microboards Copy Writer Live CWL 6200 dual CD recorder
